

# ASSOCIATE MEMBERSHIP

Here at the ACCI we are committed to improving industry efficiency and effectiveness through innovative technology and management principles. Our university based network of researchers work together in teams to introduce world leading technology and practices to clients and industry

Join our network for new ideas that will keep you at the leading edge. The ACCI Associate Member Program is an essential part of our operations. As a member you will receive access to the latest research outcomes and a wide network of academic and industry practitioners. Through us, stay in touch with leading innovators from Europe and the US. Also your support, by attending ACCI functions and providing industry feedback, will help strengthen one of Australia's leading construction research institutions.

When you join the Associate Member Program you will receive:

- Regular Newsletters
- Biannual briefings on ACCI projects and future research priorities
- Associate Bulletins
- 15% off the ACCI Annual Dinner
- 15% off all ACCI training courses

In particular our networking breakfasts and social events provide a terrific environment to interact with colleagues and peers throughout the industry.

Members of our research network are currently researching topics as diverse as:

- Tendering risk, construction process simulation, knowledge management, safety and quality management, defect avoidance on site and aspects of facilities management.
- Concrete durability in marine and acid environments, corrosion in submerged structures, wear resistance of concretes, ductility of high strength concretes and strengthening of structures using carbon fibres

A registration form is attached for your convenience and we encourage you to take up or renew membership as soon as possible. If you have any questions please do not hesitate to contact the ACCI office on 02 9385 0400 or [acci@unsw.edu.au](mailto:acci@unsw.edu.au)

We look forward to a new or continued partnership with you.

Yours sincerely,

Marton Marosszky  
Director
